CTION

iction

is required under 35 U.S.C. 121:

n to a scanning exposure apparatus
on of the driving unit and a push-back
lassified in class 355, subclass 53.

ncluding a reference position detecting unit,

ing unit, classified in class 355, subclass 72.

er because of the following reasons:

Is disclosed as usable together in a single

each other if they are shown to be separately

utility as a scanning exposure apparatus

te switch and push-back portion of invention

exposure apparatus without the fine
ve-table of invention II. See MPEP

Application/Control Number: 09/327,621

Art Unit: 2851

3. Because these inventions are distinct for the reasons given above and the search required

for one of the groups is not required for other two groups, restriction for examination purposes as

indicated is proper.

4. A telephone call was made to Mario A. Constantino on 4/13/00 to request an oral election

to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37

CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently

named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the

fee required under 37 CFR 1.17(I).

6. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Peter Kim whose telephone number is (703) 305-0105.
